ITTC 2026
INTERNATIONAL CONFERENCE & EXPO

WELCOME to ITTC 2026

The International Transport and Transit Corridors Conference (ITTC 2026) is a premier platform bringing together government leaders, industry executives, investors, logistics operators, and technology providers from around the world.

Over two days, participants will explore the latest developments in transport, logistics, transit infrastructure, and digital innovation, while establishing valuable partnerships and identifying new business opportunities.

Hosted by the Transport and Logistics Centre of Turkmenistan, ITTC 2026 highlights the country's strategic role as a key link between Europe and Asia and serves as a gateway for dialogue on the future of international connectivity and sustainable transport development.

Join us in shaping the next generation of transport and logistics solutions through collaboration, innovation, and shared vision.

INTERNATIONAL CONFERENCE & EXPO

ABOUT ITTC 2026

ITTC 2026 is a leading international platform that unites senior government officials, industry leaders, investors, and experts from the global transport and logistics sector to exchange ideas, establish partnerships, and explore new business opportunities.

Organized by the Transport and Communications Complex of Turkmenistan, including the ministries and agencies responsible for road and rail transport, civil aviation, and maritime transport, the conference serves as a hub for innovation and cooperation.

ITTC 2026 will feature discussions on emerging trends, showcase advanced technologies, foster professional networking, and strengthen international collaboration in the transport and logistics industry.

Strategic importance of the event

ITTC 2026 is positioned as a key platform for addressing global transport challenges and strengthening international cooperation in logistics and transit development.

In the context of rapidly changing global trade routes and supply chain transformation, the event provides a strategic space for dialogue between governments, businesses, and international organizations.

The forum contributes to:

- development of efficient transport corridors
- promotion of investment in infrastructure
- strengthening regional and global connectivity
- introduction of digital and sustainable logistics solutions

INTERNATIONAL CONFERENCE & EXPO

WHY TURKMENISTAN

Turkmenistan is strategically located at the crossroads of major Eurasian transport corridors, connecting Asia, Europe, and the Middle East.

Strategic advantages

- central position within Eurasian transit routes
- access to the Caspian Sea and international maritime corridors
- developing multimodal transport infrastructure (rail, road, air, sea)
- expansion of logistics and transport hubs

Infrastructure development

- modernization of railway networks
- development of highways and border logistics centers
- expansion of aviation and cargo capabilities
- growth of Turkmenbashi International Seaport as a key logistics hub

Investment environment

Turkmenistan offers a stable environment for long-term cooperation, infrastructure investment, and international partnership development in the transport and logistics sector.

SESSIONS

PLENARY SESSION:

Global connectivity and the future of Eurasian transport corridors

The plenary session will bring together senior policymakers, international organizations, and industry leaders to discuss the evolving role of Eurasian transport corridors in global trade. Participants will explore strategies for enhancing connectivity, strengthening regional cooperation, and improving the resilience of international supply chains.

SESSION 1:

The middle corridor and connectivity across the Caspian sea

This session will examine the growing importance of the Middle Corridor and the Caspian Sea route in facilitating trade between Asia and Europe. Discussions will focus on infrastructure development, multimodal transport solutions, and opportunities for greater regional integration.

SESSION 2:

Digital logistics and smart infrastructure

Experts and technology providers will explore how digital transformation is reshaping transport and logistics. Key topics include smart infrastructure, data-driven operations, automation, artificial intelligence, and the digitalization of supply chains.

SESSIONS

SESSION 3:

Investment opportunities in transport infrastructure

This session will highlight emerging investment opportunities across transport, logistics, and infrastructure projects. Government representatives, financial institutions, and private investors will discuss financing mechanisms, public-private partnerships, and long-term development strategies.

SESSION 4:

Aviation, cargo, and air connectivity

The session will address the role of aviation in supporting international trade, tourism, and economic growth. Discussions will focus on air cargo development, airport modernization, route expansion, and strengthening regional and global air connectivity.

SESSION 5:

Sustainable transport and green corridors

Dedicated to environmentally responsible transport solutions, this session will explore strategies for reducing emissions and improving energy efficiency. Participants will discuss green corridor initiatives, sustainable mobility, and innovative technologies supporting the transition to a low-carbon transport sector.

ITTC 2026

INTERNATIONAL CONFERENCE & EXPO

EXHIBITION

The ITTC 2026 Exhibition will serve as a dynamic showcase of innovative solutions, technologies, and services shaping the future of transport, logistics, and connectivity. Bringing together leading companies, government entities, infrastructure developers, and technology providers, the exhibition will provide participants with a unique opportunity to discover emerging trends, explore new business opportunities, and establish valuable partnerships.

Key sectors

- transport and logistics solutions
- railway and port infrastructure
- aviation and cargo services
- smart mobility technologies
- digital logistics platforms
- investment and infrastructure projects

Why visit the exhibition?

- discover the latest industry innovations
- connect with leading international and regional companies
- explore investment and partnership opportunities
- learn about major infrastructure and logistics projects
- engage directly with technology providers and decision-makers

ITTC 2026

INTERNATIONAL CONFERENCE & EXPO

NETWORKING & BUSINESS PLATFORM

ITTC 2026 is designed as a practical business environment supporting real cooperation and partnership development.

Key formats

- B2B meetings
- B2G discussions
- investment matchmaking sessions
- networking events

The platform enables direct communication between decision-makers and industry stakeholders.

EXPECTED OUTCOMES

ITTC 2026 is expected to deliver tangible results, including:

- strengthened international transport cooperation
- new investment agreements and partnerships
- development of transport corridors and logistics networks
- acceleration of digital transformation in the sector
- long-term regional and global connectivity growth

Projected indicators:

- 500 + delegates
- 10 + sponsors
- 100 + scheduled business meetings
- 100 + companies
- 25 + countries
- 1000 + professional visitors

ITTC 2025: Results and Achievements

In 2025, Ashgabat hosted the International Conference and Exhibition “International Transport and Transit Corridors: Interconnection and Development - ITTC 2025”, bringing together representatives of the transport, logistics, and related industries from around the world.

Key figures:

- 500 + delegates, experts, and executives
- 350 + official delegations
- 80 + international exhibiting companies
- 20 + participating countries
- 100 + B2B meetings and business negotiations

Key topics

- international transport corridors
- logistics and multimodal transportation
- maritime, railway, and air transport
- digitalization of transport infrastructure
- innovative solutions for the transport and logistics sectors

ITTC 2026

INTERNATIONAL CONFERENCE & EXPO

Among the participants

Huawei • Nokia • Cisco • Juniper • Thales • IBM • Mitsubishi • Ozon • Turkish Post • Kras-Logistics GmbH and other international companies.

Key outcomes

- productive discussions were held between government institutions and the international business community.
- projects aimed at developing transport corridors and logistics infrastructure were presented.
- participants discussed the digital transformation of the transport sector and the implementation of innovative technologies.
- new business contacts were established, creating promising opportunities for future cooperation.

ITTC 2025 reinforced its position as one of the leading international platforms for dialogue and cooperation in the fields of transport, logistics, and transit development in the region.
